

# PHOTO-03 PHOTOCELL CONTROLLER FOR STROBE SUPPLIES

The PHOTO-03 Photocell Controller plugs into the control port, and is used to automatically activate the 770, 772, 776, 780, 782, or 786 power supplies at nighttime. The optional PHOTO-03-R aux relay has a 5 amp SPDT relay contact output that can be used to control aux functions such as disabling an audible back-up alarm.

## ORDERING INFORMATION

Both units are potted and are suitable for outdoor operation in any weather.
